

APPENDIX C

THE FOLLOWING IS AN EXCERPT FROM THE STANDARDS FOR LAND SURVEYING IN NORTH CAROLINA. (Found on page 5)

B. DEFINITION OF THE PRACTICE OF LAND SURVEYING:

“Practice of land surveying” by Registered Land Surveyors shall mean any service or work, the adequate performance of which involves the application of special knowledge of the principles of mathematics, the related physical and applied sciences, and the relevant requirements of law for adequate evidence to the act of measuring and locating lines, angles, elevations, natural and man made features in the air, on the surface of the earth, within underground workings, and on the beds of bodies of water for the purpose of determining areas and volumes, for the monumenting of property boundaries, and for the platting and layout of lands and subdivisions thereof, including the topography, alignment and grades of street and incidental drainage within the subdivision, and for the preparation and perpetuation of maps, record plats, field note records, and property descriptions that represents these surveys.

The term “practice of land surveying” shall not be construed to permit the design or preparation of specifications for (i) major highways (ii) wastewater systems; (iii) wastewater or industrial waste treatment works; (iv) pumping or lift stations; (v) water supply, treatment, or distribution systems; (vi) streets or storm sewer systems except as incidental to a subdivision.

The above describes that which a Registered Surveyor may design, supervise the construction of, and certify upon completion. All other items required by this ordinance must and shall be the responsibility of a Professional Engineer registered in North Carolina.
